
Title: Electrical Power Lab

Author: Adventure Tours

The Ilshenar Electrical
Power Generator Plant

See vast underground
control rooms full of
Buttons, Switches, Control
Panels, Energy Columns,
Magic Crystals &
more!

Take the Compassion
Gate, go South to the
mouth of the Cave at
the Gypsy Camp.

This Cave teleports you
into the valley of
Blackthorn's Castle.

Go South, to the south
end of Blackthorn's
castle, then go West to
a Mountain Pass.

This short Mountain pass
leads into a Valley that
is just South of Gargoyle
City. At the far western
end of this Valley is the
Electrical Power Plant.

If you stop to play with
the Control Panels on the
outside Power Generators,
you will also have to play
with the Chaos Daemons,
Dopplegangers, Quagmires,
Arcane Daemons, Molochs,
etc.

Better to go inside - but
NOT up the stairs! Enter
the building through one
of the narrow openings in
the GROUND FLOOR
walls.

Step on the Black Square
in the center of the
ground floor room. This
will teleport you into the

vast underground complex
Control Rooms.

Explore these Chambers
carefully. The Exodus
Minions & Overseerers,
and Gargoyles-on-Steroids,
etc., sometimes come in
paragon form.

Enjoy :)

Oh, and, uh, the Author
assumes no responsibility
should you just HAVE to
push buttons and/or flip
switches while touring the
Ilshenar Electrical Power
Generator Plant.
